H-1 series modifications

The budget request contained \$1.8 million for H-1 series modifications, of which \$1.0 million was included for three AN/AAQ-22 night thermal imaging system (NTIS) product improvement program (PIP) upgrades. The AN/AAQ-22 NTIS provides the Marine Corps' UH-1N helicopter fleet with a capability to operate in both day and night conditions.

as well as in a smoke, dust or haze environment, and the PIP upgrade improves the AN/AAQ-22 NTIS by increasing resolution by greater than 20 percent, improving system stability and control, upgrading target detection and obstacle avoidance capability, and adding a laser designator to guide precision munitions. The committee understands that the UH-1Ns equipped with the AN/AAQ-22 NTIS PIP upgrade have performed superbly in Operation Enduring Freedom in their mission to identify targets of opportunity and to provide rapid alerting of threats to Allied forces. To enhance the UH-1N's mission effectiveness and to improve its flight safety, the committee recommends \$16.8 million, an increase of \$15.0 million to accelerate procurement of the AN/AAQ-22 NTIS PIP upgrade.
